

## QUIZ – HACKEO

Kevin Arias - 506211057

Código 1

t.com/level1

The screenshot shows the XSS game interface. A modal dialog box is open, displaying the message: "xss-game.appspot.com dice Congratulations, you executed an alert: 7 You can now advance to the next level." with an "Aceptar" button. The background page shows the progress "[1/6]" and the title "XSS". Below the progress bar, it says "This level demonstrates how user input is used to execute JavaScript of your choosing. You can take actions inside the vulnerable window or directly edit its URL bar." The "Mission Objective" section states: "Inject a script to pop up a JavaScript `alert()` in the frame below. Once you show the alert you will be able to advance to the next level." The "Your Target" section shows a browser window with the title "I am vulnerable" and the URL "https://xss-game.appspot.com/level1/frame?query=<script>alert(7)</script>". The page content displays "FourOrFour" and a message: "Sorry, no results were found for . [Try again.](#)"

## Código 2

xss-game.appspot.com/level2

[2/6] key

Web application side database content

ingly, client-side user-ally.

This level shows how easily XSS bugs can be introduced in complex apps.

**Mission Objective**

Inject a script to pop up an `alert()` in the context of the application.

**Note:** the application saves your posts so if you sneak in code to execute the alert, this level will be solved every time you reload it.

**Your Target**

I am vulnerable

URL  Go

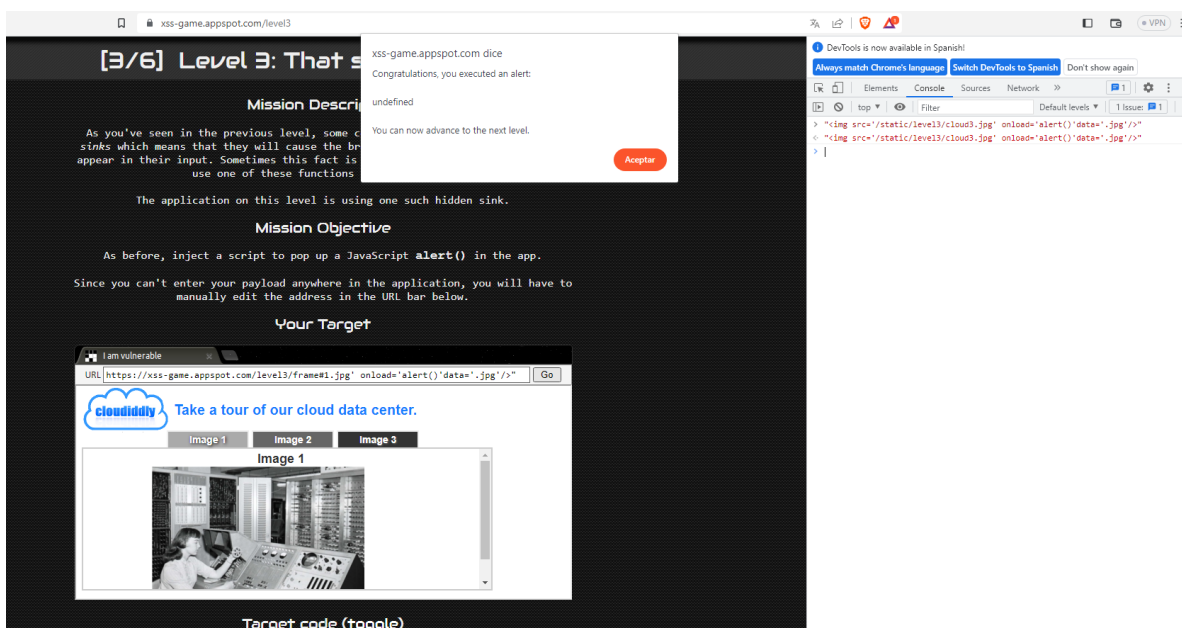

**You**
